Quality as a winning strategy

Viking tyres originate from Norway and have been developed to provide maximum performance in all weather conditions, both on paved and unpaved roads. Reliable grip, driving and braking characteristics and durability are of great importance here. Viking tyres are available in summer, winter and all-season versions in a wide range.

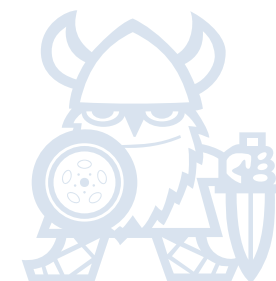

The robust characteristics of Viking

- Manufactured by the German Continental AG
- A Scandinavian brand with more than 80 years of experience
- A reliable partner in all weather conditions
- Offers excellent mileage performance

ProTech NewGen

Control the road - prolong the ride

Available in 15" to 21"

The high-end summer tyre from Viking. Optimum performance in all driving styles. Active, comfortable, stable, impressive handling and optimal grip. With a balanced price-quality ratio.

Advantages

- ✓ Safe and reliable driving on wet roads
- ✓ Feel the difference when it comes to handling and braking performance
- ✓ Easy on your wallet

CityTech II

The compact tyre

Available in 13" to 16"

The Citytech II is an economically attractive tyre with low rolling resistance and high mileage.

Advantages

- ✓ Improved protection against aquaplaning
- ✓ Excellent handling on dry roads
- ✓ Reduced noise level and improved driving comfort

TransTech NewGen

Long-lasting performance for heavy weight

Available in 14" to 17"

The Viking TransTech NewGen is your well-balanced solution for heavy weight. Supported by robustness, a competitive rolling resistance level and an overall good price-performance ratio, this tyre is a smart choice offering safety and efficiency at the same time.

Advantages

- ✓ High mileage: Benefit from high cost effectiveness due to long lasting tyre performance
- ✓ Dry handling: Master any challenge ahead with very good handling performance on dry roads
- ✓ High comfort: Enjoy pleasant rides with a noise reducing pattern design

FourTech Plus

Reliable performance throughout the year

Available in 13" to 19"

The Viking FourTech Plus is your well-balanced solution taking you through all seasons of the year. The proven performance of its pattern equipped with a new compound leads to a new generation of reliable safety performance throughout the whole year.

Advantages

- ✓ Rolling resistance: Benefit from reduced fuel consumption for less costs
- ✓ Wet performance: Experience reduced aquaplaning risk and shorter braking distances on wet roads
- ✓ Dry performance: Enjoy reliable braking and handling on dry roads

FourTech Van

The robust all-season tyre

Available in 15" & 16"

Hot and dry roads in summer or snowy roads in winter: The FourTech Van offers a high level of safety and excellent durability in all weather conditions. For transport vehicles and delivery vans.

Advantages

- ✓ High wet performance on wet roads
- ✓ Enhanced traction on snow
- ✓ Safe cornering in all weather conditions

WinTech

At home in winter - the cold climate specialist for safe grip on snow

Available in 13" to 20"

WinTech delivers constant performance in fast changing weather conditions – excellent grip and driving stability are assured thanks to their innovative pattern and optimised silica technology.

Advantages

- ✓ Impressive handling in low temperatures and wet environments
- ✓ Excellent grip on snow, reliable driving and braking properties
- ✓ Optimised protection against hydroplaning through fast, maximized water drainage

WinTech NewGen

The perfect choice for every winter ride

Available in 16" to 20"

The Viking WinTech NewGen offers reliable performance as you have come to expect from Viking tyres, with improved snow performance and lower rolling resistance. This winter tyre guarantees safe and comfortable handling even in severe winter conditions.

Advantages

- ✓ Excellent grip and safety when driving on snow
- ✓ Lower rolling resistance reduces fuel consumption
- ✓ Optimal grip and stability on wet roads

WinTech Van

The snow professional for safe grip and high mileage

Available in 14" to 17"

A reliable partner with a high level of safety and excellent driving comfort, even with the harsh winter conditions in Scandinavia. For transport vehicles and delivery vans.

Advantages

- ✓ Excellent snow traction and braking performance
- ✓ Optimum aquaplaning safety
- ✓ High mileage performance
